Relevant Experience

Meta — Product Growth Analyst, Facebook Notifications

Menlo Park, CA • Jul 2025 – Present

- Lead a cross-org initiative to unify push and email notification systems; designed multi-region capacity test identifying impact of **200K+ DAU**, and drive ML optimization and roadmap decisions
- Own analytics and reporting for Facebook Widgets, driving performance insights for Events widget launch and experimentation pipeline
- Develop the use of cross-app and device-level signals to improve ML-based notification timing; leveraged battery state and Focus Mode signals in timing, leading to a **4%** increase in CTR
- Drove push reachability strategy via analysis of user engagement, leading to surface expansion of upsells

Cloudflare — Product Analyst II

San Francisco, CA • Sep 2023 – Jun 2025

- Built A/B testing and experimentation platform enabling product teams to evaluate usage, conversion, and revenue metrics, driving **+16% subscriptions**, **+7% adoption**, **+23% upgrades**
- Defined KPIs, conducted performance analysis, and built Tableau dashboards for Application Performance and Developer Platform products
- Partnered with engineering to enhance internal data tools, driving **\$250K+ ARR expansion** through upsell insights

Good Eggs — Product Analyst (Growth & Customer Experience)

Oakland, CA • Jan 2022 – May 2022

- Launched unavailable product recommendation feature increasing checkout rate by **40%** for users with unavailable items in their cart

Capital One — Business Analyst (Data Science)

San Francisco, CA • Aug 2020 – Jan 2022

- Built Python-based evaluation tool for new data sources, reducing credit exposure by **5%** and increasing model returns by **1.3%**
- Automated rejection messaging pipeline, reducing legal tickets by **20%** and enabling faster data integration

Product Management and Analytics Intern

New York City, NY • Jun 2019 – Aug 2019

- Redesigned onboarding for Paribus (Capital One Shopping), increasing CTR by **41%** and installs by **27%**
- Implemented A/B testing and event tracking using SQL to measure launch performance

Education and Skills

University of Pennsylvania — B.A. Computer Science & Economics (Double Major)

Technical — SQL, Python, Claude Code, Tableau, Figma, Make, JavaScript, HTML,

Product & Analytics — A/B Testing, Experimentation, Product Development Life Cycle, KPI Development, Product Analytics, Stakeholder Management
